

Introducing

SWINGURU.^{pro}

The world's first real time, markerless, gesture recognition golf training and teaching system.

SWING, RECORD, REPLAY, AND ANALYZE YOUR SWING IN 3D.

The new Swinguru Pro training system combines full body 3D visualization with simple, intuitive, and interactive feedback for golf swing analysis. Easy-to-use, Swinguru Pro operates using a single 3D depth sensing camera.

3D Full Body Visualization

Real-Time Feedback

Motion Capture

Multiple Views and Angles

One Single Camera

Virtual Balance Plate

Engaging & Interactive

Intuitive & Ease to Use

FEATURES & BENEFITS

swinguru

SWING CAPTURE

Instant swing detection and replay capabilities allow automatic visual indicators to analyze centre of gravity displacement, sway, head movements, hand path and more. Swings can be played back in slow motion, or frame by frame.

EASY STUDENT INTERACTION

Swinguru Pro brings an exciting approach to golf training. It improves the quality, diversity and variety of golf lessons. It allows students to improve their skills via an interactive, educational and fun application, with or without tutoring from a trainer.

KEY SWING POSITIONS

Record up to 7 ideal postures, then correctly match your movements during progressive stages with live audio and visual feedback. A natural golf routine helps you train toward your desired swing.

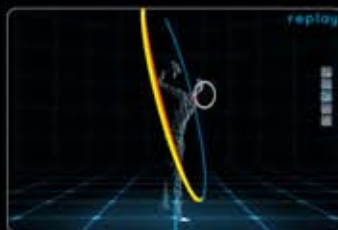

3D GESTURE CONTROL

Experience natural, immersive teaching and training experiences through gesture-based user interfacing by combining full body tracking technology and 3D hardware. Users navigate and control the application cursor with hand gestures.

THE GREAT WAY TO TEACH

Utilize automated, state of the art tools, including an iPad based instructors console. Instructors can become "certified training centers" driving referrals and revenue.

STEP-BY-STEP APPROACH

Swinguru Pro verifies correct training execution by adopting a gradual training approach. Users improve at their own pace.

VIRTUAL BALANCE PLATE

Instant swing detection and replay capabilities allow automatic visual indicators to analyze centre of gravity displacement, sway, and head movements.

PRICE

Swinguru Pro 3D Gesture Recognition Camera, Software, Computer, and Touchscreen.....\$5800
